Zebra Easy Concrete

Transform your living spaces

Welcome to the evolution of design with Zebra Easy Concrete

A seamless, elegant, and
durable coating designed
to transform any space.

Zebra

Zebra is a registered trademark that develops high-quality cementitious solutions designed to be easy to apply and built to last. Our all-in-one systems are engineered for efficiency and consistency—helping renovation and installation projects move faster with clean, modern finishes.

We offer all-in-one, ready-to-use solutions. We create sustainable, efficient, eco-friendly, and economical systems accessible to everyone.

With Zebra, renovating, repairing, or building is easier, cleaner, and faster.

**Solutions that transform. Do it yourself,
keep it easy, go Zebra!**

Zebra: Complete solutions.

What is Zebra Easy Concrete Microcemento?

It is a high-strength cementitious coating with a decorative finish applied in thin layers (2.5 to 3 mm) to almost any surface. It is perfect for both indoors and outdoors, thanks to its excellent adhesion and weather resistance.

It can be applied to floors, walls, showers, countertops, stairs, and even furniture.

It creates a seamless, modern, minimalist aesthetic with no visible grout lines and generates minimal disruption during renovations.

It is ideal for quick and clean renovations, as well as for finishes in new construction projects, including architectural, commercial, healthcare, and industrial spaces.

Microcemento: Transform your spaces, renew your style.

Elegance and versatility for your space !

Key Features:

Durable & Wear-Resistant: Designed to handle daily use, impacts, and humidity—helping surfaces look great longer.

Fast, Clean Renovations: A streamlined application that can minimize downtime in many projects.

Design Flexibility: A wide range of colors and finishes, including custom textures.

Wet-Area Ready (System-Based): Designed for high-moisture environments when applied and sealed according to specification, supporting long-term performance.

Zebra Easy Concrete Microcement System

Covers up to 134.5 ft² (12.5 m²) finished

BEFORE

AFTER

ADVANTAGES

Coverage: Floors: 12.5 m² → 134.5 ft² (12.5 m²) / Walls: 14 m² → 150.7 ft² (14 m²).

All-in-One: No primers, reinforcing mesh, emulsions, or extra additives required under standard system conditions (per specification).

Cost-Effective: More economical than other traditional materials.

Efficiency: Faster drying time and shorter installation time.

Superior Performance: Extreme adhesion, greater durability, and easier application.

User-Friendly: No sanding required between base coats.

Seamless: finish with no visible grout lines.

Versatile: Suitable for both exterior and interior application.

Clean Work: No demolition needed; easy cleanup.

Extended Workability: Special formula maintains plasticity for longer use.

OTHER QUALITIES

Application Efficiency:

- **Quick Installation:** Applied in thin layers, Zebra Easy Concrete Microcement can be installed faster than comparable products.

Low-Profile Application (Does Not Alter Floor Levels Significantly):

- **Ideal for renovations:** Due to its minimal thickness, it does not significantly alter existing floor levels. This is especially beneficial in spaces where maintaining height is critical, such as apartments or houses with low ceilings.
- **Compatibility with Existing Surfaces:** Zebra Easy Concrete can be applied over various surfaces such as concrete, cement, plaster, drywall, porcelain tile, ceramic tile, wood, and more, without removing the existing floor. This facilitates renovation without additional complications.

Enhanced Design and Aesthetics:

- **Elegant Appearance:** Creates continuous, homogeneous surfaces with a clean, modern look and no visible grout lines.
- **Design Versatility:** Multiple colors and textures support creative, customized interiors.

Zebra Easy Concrete – Seamless Beauty for Wet Areas

Designed to perform in moisture-exposed environments. When applied and sealed according to specification, Zebra Easy Concrete Microcemento is well-suited for bathrooms, showers, spas/hot tubs, and other wet areas—delivering seamless, elegant, and safe surfaces.

- Water and UV resistant.
- Non-slip and high adhesion.

Style and functionality—even in wet environments.

ADVANTAGES VS. STANDARD MICROCEMENTS

- **No Primer Required:** Included as part of the system (per specification).
- **No Mesh Required:** Typically not required under standard system conditions (depending on substrate).
- **Just Add Water:** Only requires mixing with water for application (no emulsions needed)
- **Minimal Sanding:** No sanding required between coats (only the final coat).
- **Extreme Resistance:** Superior durability.

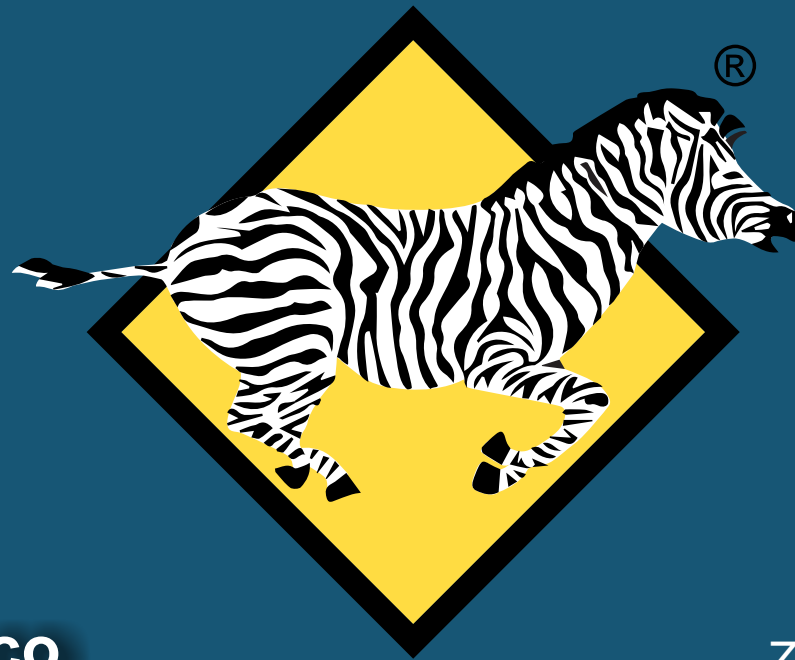

Color Diversity

Wide Palette: Zebra Easy Concrete Microcement is available in a wide range of colors, from elegant neutrals like Extra White, Black, Gray, and Beige, to vibrant and bold colors that add character to any space

Customization: Customers can choose from standard colors or work with us to create custom shades.
